

# PRACTICAL Business Analyst (With AI Edge)

A Competency Development Programme for budding Business Analysts to master the Science & art of Business Analysis to excel at the workplace.

## WHY ENROLL FOR OUR PROGRAMME?

Most Business Analyst programs focus on theory and methods, but real success demands practical application. In today's AI-driven business environment, Business Analysts must know how to what is **AI** and how **AI** is being used to address business problems. Our "Practical Business Analyst" program bridges these gaps through interactive workshops and hands-on exercises. It equips participants with essential Business Analysis skills and **AI** proficiency-empowering them to deliver agile, intelligent solutions in the modern workplace.

- Case Studies and Role-plays for competency development
- Hands-on workshops for tools and techniques required for Business Analysis
- Faculty with practical work experience of more than 25 years
- Program Batch Size of NOT MORE THAN 20 participants
- Career Counselling Session & Placement Support
